

Bear Brook Archery Range

Eagle Scout Project
James Kirk: Troop 163 Chester, NH

BEFORE

Excelsior bale targets

Pressure treated frames

Burlap target faces

Old Excelsior Bales

Remains of an Old Target

New Target Material: Ethafoam

Holds up better than excelsior bales

Can be replaced in strips rather than entire bale

Easier to replace and maintain

Easier to store

Result: Substantial cost savings on maintenance over the long term.

Workday #1

This was a rainy and cool day . Everyone was fed and cover was provided to help get out of the rain. Six targets were replaced this day.

Drilling Holes and Some Assembly

Beginning Assembly of New Target

Part of Troop 163, Staff and Parents on Workday #2

A New Target and Very Sturdy Design

Putting On the New Target Faces

After
All 14 targets were replaced and a new 15th
target is also planned.

Target #6
